◆ WHAT YOU GET

Data Cleansing: what we deliver

Duplicates, wrong specifications and inconsistent descriptions quietly slow every report and every work order. We audit, clean and validate your SAP master data.

01

Duplicate Master Data Removal

Identify and consolidate duplicate equipment, materials and locations.

02

Material Master Correction

Fix specifications and classifications in material master records.

03

Equipment & FLOC Cleanup

Make equipment and functional location data consistent.

04

Standardisation

One naming convention, one code set, one description style.

05

Data Validation

Validate every record against your business rules.

BEST FOR

Teams with years of accumulated records, duplicate parts and reports nobody fully trusts.

◆ HOW IT WORKS

From first call to working results

- 1 Data audit**
Quality assessment of current records
- 2 Issue log**
Identify and document every problem
- 3 Cleansing strategy**
Agree the rules and approach
- 4 Cleanup & consolidation**
Correct, merge and standardise
- 5 Validation**
Verify the result against the rules
- 6 Ongoing monitoring**
Keep quality from drifting back

◆ WHAT YOU GAIN

- ✓ Improved system performance
- ✓ Accurate reporting and analytics
- ✓ Fewer data-related errors
- ✓ Better decisions from clean data
- ✓ Compliance with data governance standards
