◆ WHAT YOU GET

Master Data Setup: what we deliver

Functional locations, equipment, task lists, BOMs and maintenance plans, structured around how your plant really runs. Configured once, standardised everywhere.

01

Functional Location Creation

A hierarchical structure that mirrors your plant layout and organisation.

02

Equipment Master Creation

Equipment records with technical specifications, classifications and relationships.

03

Maintenance Task Lists

Clear task lists that guide technicians through every required procedure.

04

BOM Creation

Bills of Materials that link equipment to the spare parts and components it needs.

05

Maintenance Plan Configuration

Plans with the right intervals and strategies, ready to schedule work.

BEST FOR

Plants preparing an SAP PM/MM rollout, or fixing a rollout whose data never quite worked.

◆ HOW IT WORKS

From first call to working results

1

Current-state analysis

Assess existing data and gaps

2

Structure design

Design the optimal master data structure

3

SAP configuration

Create and set up records in SAP

4

Validation & testing

Check data against rules before go-live

5

Training & documentation

Hand over with user guides and training

◆ WHAT YOU GAIN

- ✓ Improved data accuracy and consistency
- ✓ Streamlined maintenance operations
- ✓ Better asset tracking and management
- ✓ Enhanced reporting and analytics
- ✓ Fewer system errors and data conflicts
