◆ WHAT YOU GET

Implementation Support: what we deliver

Implementing or improving SAP Plant Maintenance and Materials Management takes plant knowledge and system knowledge together. We support your project team, or run the PM/MM workstream, from first workshop to stable operations.

01

Blueprint & Process Design

Workshops to capture maintenance and stores requirements and design the SAP PM/MM process.

02

Configuration & Master Data

PM and MM configuration, plus equipment, functional location, BOM and task list setup.

03

Data Migration & Cleansing

Prepare, cleanse, validate and load master data so go-live starts with data you can trust.

04

Testing & User Training

Test scenarios, UAT support and end-user training before go-live.

05

Go-Live & Hypercare Support

Cutover support and issue resolution while your team settles in.

BEST FOR

Plants and project teams implementing SAP PM/MM, extending it to new sites, or recovering a rollout that stalled.

◆ HOW IT WORKS

From first call to working results

- 1 Discovery workshops**
Understand plant processes and goals
- 2 Blueprint**
Agree the process and the SAP design
- 3 Build & migrate**
Configure, then prepare and load data
- 4 Test & train**
UAT with real scenarios and trained users
- 5 Go-live**
Cutover with support on hand
- 6 Hypercare**
Resolve issues and stabilise operations

◆ WHAT YOU GAIN

- ✓ PM/MM expertise inside your project team
- ✓ Smoother go-live with validated data
- ✓ Processes that fit how your plant works
- ✓ Users trained before the system goes live
- ✓ Flexible: advisory, workstream lead or full support
